

Juliette Faivre

jecf2@cantab.ac.uk • +352 661 825 089 • French, Polish, Luxembourgish

RESEARCH INTERESTS

- **Human-AI collaboration in organizations** : how digital technologies reshape work, communication, creativity and productivity.
- **Ethical technology in business** : how organizations can design, deploy and govern user-centered technologies responsibly.
- **Societal impacts of digital technologies**: implications on privacy, digital governance and children's wellbeing.

My strengths lie primarily in literature review and qualitative research (e.g. structured and semi-structured interviews), and transforming findings to generate new insights. I also have foundational skills in quantitative analysis (R, Python, and SPSS), with experience in survey design and data collection tools (Qualtrics, Microsoft Forms).

EDUCATION

University of Cambridge

MPhil in Technology Policy (UK average : 72%, GPA : 3.87/4)

Sep. 2022 – Jun. 2023

Cambridge, United Kingdom

- **Award** : Awarded a Commendation Letter from the board of examiners for ranking among the top 3–5 students in my degree program.
- **Research Areas** : (Generative) AI Policy & Governance, Technology Privacy & Ethics, Business and Social Impact

University of Pennsylvania, Wharton Business School

Exchange Year (Dean's List – Academic Year, GPA : 3.8/4)

Aug. 2021 – Jun. 2022

Philadelphia, United States

Selected for 1 of 3 King's College London's places for a full exchange year at the Wharton Business School

- **Relevant courses** : Enabling Technologies; Data & Analysis for Marketing Decisions; Ethics & Social Responsibility; Innovation and Antitrust

King's College London

BSc. (Hons) in International Management (First-Class Honors, UK average : 73%, GPA : 3.93)

PROFESSIONAL EXPERIENCE

Ernst and Young

Senior Consultant in Business Transformation (*Jun. 2025 - Present*)

Sep. 2023 – present

Luxembourg, Luxembourg

- Led a project with a major European institution to assess the digital maturity of Luxembourg's public services online; conducted interviews with national authority representatives and end-users, developed UX journey maps, and delivered evidence-based recommendations.

Junior Consultant in Business Transformation (*Sep. 2023- Jun.2025*)

Luxembourg, Luxembourg

- Piloted a regulatory newsletter strategy by designing and mapping a human-AI collaboration workflow, where AI identified and filtered policy and market news and human experts validated and contextualized outputs to ensure accuracy, accountability, and relevance for the regulator's decision-making.
- Led a UX/UI review for an engineering firm by evaluating their website, benchmarking against industry peers, and implementing optimizations based on UX/UI and responsible design principles.
- Conducted a market study of Luxembourg's transportation systems, combining primary research and international benchmarking to propose innovation strategies.
- Supported Luxembourg's Ministry of Defense in enhancing recruitment strategy by mapping and optimizing recruitment and internal processes.

IBM

Business Development Representative - Intern

May 2022 – Aug. 2022

Dublin, Ireland

- Designed and presented a sales tool to executive management, analyzing performance data and team behaviors to identify best practices and improve KPIs.
- Organized weekly events with guest speakers to present and discuss tech-related topics such as AI and cybersecurity, enhancing team collaboration and knowledge.

RESEARCH EXPERIENCE

British Office of Communications (Ofcom)

Visiting Policy Researcher in Generative AI & Online safety

Mar. 2023 – Jun. 2023

London, United Kingdom

- Conducted exploratory, empirical research on the safety of Generative AI tools for children, by evaluating user interfaces of different chatbots.
- Compiled findings and online threat risk mitigation strategies in a >30-page team report and presented highlights to >50 UK policymakers.

European Commission

Visiting Researcher in IoT (Internet of Things), Circular Economy (CE) and AI

Jun. 2023 – Jun. 2023

Warsaw, Poland

Selected by the University of Cambridge and awarded €2,000 to conduct research for the European Union under the Horizon 2020 Marie Skłodowska-Curie grant.

- Conducted a literature review and qualitative interviews with local experts in Warsaw to assess business models that blend IoT, CE, and AI.
- Submitted an academic paper (CE-IoT-AI) that describes the findings and offers tangible action points to develop EU-wide IoT-CE-AI business models.

Cambridge Experimental and Behavioural Economics Group

Research Assistant in Generative AI and creativity

Oct. 2022 – Dec. 2022

London, United Kingdom

- Assisted Prof. Yingyue (Luna) Luan in collecting data for qualitative and quantitative experiments using Midjourney and Qualtrics.
- Prepared the lab and computer experiments, welcomed participants, explained the protocol and the study implications.

Think Tank and Civil Societies Program (TTCSP), Lauder Institute (University of Pennsylvania)

Science & Technology Research Intern, under the supervision of Prof. McGann.

Sep. 2021 – Dec. 2021

Philadelphia, United States

- Collected and analyzed research outputs from >80 tech think tanks (AI, privacy, etc.), summarizing findings for the yearly "Go Global Think Tank" report.
